

## Construction Information Guide

Fall 2009 and Spring 2010, the City of Laramie will implement the upgrading and replacement of water mains, placement of storm water infrastructure, curb gutter and sidewalk followed by paving several West Laramie streets. Work is scheduled to begin in mid-October 2009. Completion is planned for June 2010.

### How will this project impact West Laramie businesses, residents and special events?

City staff and the general contractor will coordinate and work together to do everything possible to minimize the disruption to West Laramie businesses and residents. It is anticipated that streets will be closed for a short amount of time when water mains are replaced and storm water infrastructure is placed. All street closures will be scheduled in one half block intervals.

This guide will provide you with information about the proposed project schedule until winter shutdown and include contact information for people to call if you have any questions during the project. Thank you for your ongoing support of this necessary project!

## How do I get current project info?

- ◆ City of Laramie website:  
[www.cityoflaramie.com](http://www.cityoflaramie.com)
- ◆ Channel 11
- ◆ Laramie Boomerang
